Investment Strategy	Edelweiss CRISIL-IBX AAA Bond NBFC-HFC Index – Jun 2027 Index Fund is a passively managed Index fund which will employ an investment approach designed to track the CRISIL-IBX AAA NBFC- HFC Index – Jun 2027. The Scheme will invest at least 95% of its total assets in the instruments representing the underlying Index. Accordingly, the Scheme will invest in instruments in line with the benchmark index of the Scheme. The Scheme may also invest in money market instruments to meet the liquidity and expense requirements. Being a target maturity scheme, it will mature on the Maturity Date. The Scheme shall replicate the underlying debt index subject to the requirements as specified under para 3.5 of SEBI Master Circular on Mutual Funds dated June 27, 2024.

	The Scheme will abide by the relevant provisions contained in Paragraph 3.5 of SEBI Master Circular dated June 27, 2024, including but not limited to investment limits for single issuer, group, sector; disclosure norms; tracking error and tracking difference.
	The Scheme shall be considered to be replicating the underlying index, provided:
	i. The Macaulay duration (MD) of the portfolio of ETF/ Index Fund replicates the MD of the underlying index within a maximum permissible deviation of +/- 10%.
	ii. In case of Target Maturity (or Target Date) ETFs/ Index Funds, the following norms for permissible deviation in MD shall apply:
	a. For portfolio with residual maturity of greater than 5 years: Either +/- 6 months or +/- 10% of MD, whichever is higher.
	 b. For a portfolio with residual maturity of up to 5 years: Either +/- 3 months or +/- 10% of MD, whichever is higher.
	c. However, at no point of time, the residual maturity of any security forming part of the portfolio shall be beyond the target maturity date of the ETF/ Index Fund.
Risk Profile of the	Mutual Fund Units involve investment risks including the possible loss of principal. Please read
Scheme	the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are
	summarized below:
	1. Risk associated with investing in Non-Banking Finance and Housing Finance
	 Portfolio Concentration risk: To the extent that the Scheme may concentrate its investments
	in the securities of certain issuers sectors, the Scheme will therefore be subject to the risks
	associated with such concentration. In addition, the Scheme may be exposed to higher levels
	of volatility and risk than would generally be the case in a more diverse fund portfolio of debt
	securities. These sectors may be more sensitive to economic cycles.
	• Systemic Risk: The finance sector is highly interconnected. A crisis in one institution or
	segment can trigger a cascading effect throughout the sector, affecting even well-performing
	entities. Events such as payment failures or credit rating downgrades can lead to panic and
	widespread selling, impacting concentrated investments significantly.
	• Regulatory Changes : The sector is subject to frequent regulatory changes. Concentration in
	specific financial instruments may expose investors to risks if regulations tighten suddenly
	 Interest Rate Risk: Financial debt instruments are particularly sensitive to interest rate fluctuations. Concentrated investments in long-duration bonds can lead to greater price volatility as rates rise. Changes in the yield curve can disproportionately affect concentrated
	holdings, especially if they are heavily weighted in certain maturities.
	Liquidity Risk: Concentrating investments in a limited number of financial securities may lead
	to liquidity challenges. During market stress, selling these securities may become difficult
	without significant price concessions. If investors seek to redeem shares in a concentrated
	fund, the fund may struggle to liquidate positions quickly, leading to further price impacts and potential losses.

2. Risks Associated with investing in Debt and Money Market Instruments

- Interest rate Risk: Price of a fixed income instrument generally falls when the interest rates move up and vice- versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- Credit risk or default Risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Though the funds will actively invest in only AAA rated security, any downgrade in this rating will have a negative impact on the fund.
- Liquidity & Settlement Risk: The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- Lot size risk: To meet subscription / redemption requirement, fund manager may have to add /reduce odd lots of a security. Such odd lots may be harder to buy/ sell compared to round lots. This can result in longer buying / selling times or lower prices. The fund manager may decide to sell more feasible security or hold higher cash in fund until deployment or have to allot / reduce across funds of similar fund objective.
- Reinvestment Risk: Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security. If a concentrated fund holds a significant amount of bonds maturing in a specific timeframe, reinvestment options may be limited, potentially leading to lower returns.
- Performance Risk: Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- Prepayment Risk: The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- Market Risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.
- Concentration Risk: The Scheme Portfolio may invest across sectors subject to SEBI prescribed limits applicable from time to time in line with Scheme objective, Investment strategy and applicable regulations.

3. Risks Associated with investing in Government Bonds:

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

4. Risk Factors associated with Passive Schemes:

a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

b. <u>Tracking Error and Tracking Difference Risk:</u>

Tracking Error and Tracking difference is to measure the divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on the availability of issuances by the Financial companies and other organizations and Fund management decisions, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error and Tracking difference. Tracking error / Tracking difference are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the underlying index. That said, the risk parameters of the portfolio of the Scheme and underlying index would be similar.

- Tracking error could be the result of a variety of factors including but not limited to:
- Due to investment in out of index investments
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.
- Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment, etc

Due to the reasons mentioned above and other reasons that may arise, the Fund will endeavor to keep the tracking error and tracking difference as low as possible. Under normal circumstances, such tracking error is expected to be below 2% per annum and the annualized tracking difference averaged over one year period is expected to not exceed 1.25%. However, it needs to be clearly understood that this is an indicative range and that the actual tracking error and tracking difference adjusted to be higher or lower than the range given under special circumstances.

	c. Trade Execution Risk on RFQ Platforms:
	Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.
	5. Risks Associated with exposure in Tri-party Repo Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –
	 Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction. Risk of default by a borrower in repayment.
	 6. Risks Associated with segregated portfolio 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer. 2) Portfolio comprising of Segregated Portfolio may not realise any value or may have to be written down.
	Listing of units of Segregated Portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
	For details on risk factors and risk mitigation measures, please refer SID.
Plans/Options	The Scheme will offer two Plans: 1. Regular Plan; and 2. Direct Plan
	The Direct Plan will be offered only for investors who purchase /subscribe Units of the Scheme directly with the Fund and will not be available for investors who route their investments through a Distributor. In case neither Distributor's Code nor "Direct" is indicated in the application form, the same will be treated as "Direct Plan" application.
	The portfolio of the Scheme under both these Plans will be common. Each Plan will offer: (i) Growth Option and (ii)Income Distribution cum Capital Withdrawal (IDCW) Option.

	IDCW Option shall have Reinvestment, Payout & Transfer Facility.
	The AMC/Trustee reserve the right to introduce Plans/Option(s) as may

On receipt of the KYC documents from the Fund, the KRA shall send a letter to the investor within SEBI stipulated timelines, confirming the details thereof.

Edelweiss Asset Management Limited and NISM/AMFI certified distributors who are Know Your Distributor (KYD) compliant are authorized to undertake the IPV for mutual fund investors. - Existing KYC compliant investors of the Fund can continue to invest as per the current practice. However, existing investors are also urged to comply with the new KYC requirements including IPV as mandated by SEBI.
- Application Form not accompanied by KYC Application Form or letter / acknowledgment issued by KRA may be rejected by the Fund. FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.
