## I. INTRODUCTION

## A. RISK FACTORS:

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

## a) STANDARD RISK FACTORS:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee against loss in the Scheme or that the Scheme's objective will be achieved.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on various factors and forces affecting the capital markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- BHARAT Bond FOF April 2030 is the only name of the Scheme & it does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of ₹ 1,00,000 made by it towards setting up the Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

## b) SCHEME SPECIFIC RISK FACTORS:

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

- 1. Risks Associated with Fixed Income and Money Market Instruments:
- Interest rate risk: Price of a fixed income instrument falls when the interest rates move up and vice- versa, which will affect the NAV accordingly.
- Spread risk: Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts.
   Prices of corporate bonds tend to fall if this spread widens which will affect the NAV of the Scheme accordingly.
- **Credit risk or default risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations.
- Liquidity Risk: The Risk of non execution of sale/purchase order due to low volumes is liquidity risk.
- Reinvestment risk: Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- Performance Risk: Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- Market risk: Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be

more sensitive to changes in economic conditions than higher rated securities.

2. Risk Factors associated with Underlying Scheme i.e. BHARAT Bond ETF - April 2030 :

## i. Lack of Vibrant Secondary Market for Units of BHARAT Bond ETF - April 2030:

Although the Units of BHARAT Bond ETF - April 2030 will be listed on the Stock Exchanges such as NSE & BSE, there can be no assurance that an vibrant secondary market for units of BHARAT Bond ETF - April 2030 will be developed or maintained by the Authorised Participants.

## ii. Halting of Trading in Units of BHARAT Bond ETF - April 2030:

Trading in the Units of BHARAT Bond ETF - April 2030 on NSE & BSE may be halted because of market conditions or for reasons that in view of NSE & BSE, SEBI or any other Regulatory authorities, trading in the units of the BHARAT Bond ETF - April 2030 is not advisable.

In addition, trading of the BHARAT Bond ETF - April 2030 are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI 'circuit filter' rules.

There can be no assurance that the requirements of NSE & BSE necessary to maintain the listing of the Units of the BHARAT Bond ETF - April 2030 will continue to be met or will remain unchanged.

## iii. Lack of secondary market depth:

In case of unit creation and unit redemption in BHARAT Bond ETF - April 2030. BHARAT, Bond ETF - April 2030 will have to either buy a basket of securities or sell a basket of securities in proportion of the underlying index. This requires an active secondary market for underlying securities at all points of time. A lack of depth in secondary market for underlying securities could hamper the efficient transaction in unit creation and unit redemption.

## iv. Units of BHARAT Bond ETF - April 2030 may trade at prices other than NAV:

Depending on the demand-supply dynamic, the of BHARAT Bond ETF - April 2030 may either trade on the Stock Exchange above or below its NAV. This may give rise to arbitrage opportunities. However, the in-built mechanisms of unit creation and unit redemption in the form of Cash or in-kind is designed to reduce the arbitrage opportunity for market participants.

## v. Regulatory Risk:

Any changes in Regulations by SEBI / RBI / Stock Exchange / GOI / and other decision makers may hamper the ability of the market participants in trading to arbitrage resulting into wider premium/discount to NAV.

## vi. Asset Class Risk:

The returns from the types of Securities in which BHARAT Bond ETF - April 2030 invests may under-perform returns of general Securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

## vii. Risk of Investment Strategy

As units of BHARAT Bond ETF - April 2030 would be primarily investing in the Bonds of CPSE/CPSU/CPFI or any other eligible entities, any government policy which will have an impact on central public sector enterprises, including any change in the disinvestment policy of the government, could impact the price of the underlying assets. This may have negative impact on the performance of the Scheme.

## viii. Risk of Credit Rating changes

It is understood that most of the CPSEs securities' higher credit rating is due to government ownership and implied government support. Any potential change in government control, shareholding pattern, market perception, corporate action etc., could result in potential downgrade of credit rating of the Issuers. This may have negative impact on the performance of BHARAT Bond ETF - April 2030.

## ix. Risk of Investment in eligible securities

The Scheme objective of BHARAT Bond ETF - April 2030 is to invest in eligible CPSEs securities as defined in the Index. BHARAT Bond ETF - April 2030 will invest in the securities predominantly through private placement route. These securities are generally auctioned on Electronic Bidding Platforms (EBP) in anonymous manner through competitive bidding. It is quite possible that the BHARAT Bond ETF - April 2030 may not be able to subscribe to these securities in sufficient quantities. This may result in suboptimal asset allocation until the next bidding takes place.

x. Risk of variation in asset allocation as compared to the Index BHARAT Bond ETF - April 2030 intends to accept "in-kind" unit creation request from investors. The criteria for securities eligible for "in-kind" subscription has been defined in this document. It is possible that the "in-kind" subscription may result in variation in asset allocation as compared to the Index asset allocation.

#### xi. Risk of sovereign rating change

The valuation of the eligible CPSEs securities is based on the shape of the sovereign bond yield curve. The level of sovereign bonds are, apart from other factors, dependent on the sovereign rating of India by global Credit Rating Agencies. Any potential change in India's sovereign credit rating may have direct impact on the levels of sovereign bonds which in turn may have impact on the eligible CPSEs securities.

#### xii. Risk of higher supply of CPSEs securities

There has been an increase in total issuances of CPSEs securities in last 3 years. This has resulted in "crowding out effect" in the corporate bond market. As a result, credit spreads of certain CPSEs issuers with higher supply have widened as compare to other CPSEs issuers. This has also resulted in higher concentration for certain CPSEs issuer resulting in lack of appetite. Any incremental issuance from these CPSEs is likely to be met with lukewarm response from the investors, resulting in further widening of credit spreads.

### xiii. Lack of supply of eligible securities with desired maturity

The target maturity bond ETF structure has a pre-defined maturity date. This necessitate investment in eligible securities maturing within 3 months before the maturity date of the Scheme. Any decline in potential supply of eligible securities maturing within 3 months before the maturity date of BHARAT Bond ETF - April 2030 may expose the Scheme to the reinvestment risk or investing in lower yielding TREPS in the maturing year of the BHARAT Bond ETF - April 2030. This may be detrimental to the investor interest.

#### xiv. Increase in supply of Tax-free bonds from CPSEs Issuers

The target maturity bond ETF structure is designed to provide

investor with long-term fixed income asset allocation to high qualities CPSEs with better tax-adjusted returns in the current interest rate environment. Any potential increase in supply of Tax-free bonds from CPSEs issuer may adversely impact the demand and future growth of BHARAT Bond ETF – April 2030.

Edelweiss

MUTUAL FUND

#### xv. Risk of divergence in credit rating of BHARAT Bond ETF -April 2030 and the Index

BHARAT Bond ETF - April 2030 intends to invest in AAA rated eligible CPSEs entities. Any potential credit rating downgrade will necessitate the Scheme to sell bonds of downgraded CPSEs entities at market level and invest in new AAA rated eligible CPSEs entities. This exercise is dependent on the secondary market liquidity in affected CPSEs entities. In case if the BHARAT Bond ETF - April 2030 is unable to liquidate these bonds in the open market, this will result in divergence in the credit rating composition between the BHARAT Bond ETF - April 2030 and the Index.

## 3. Risks associated with investing in Tri Party Repo through CCIL (TREPS):

Risk of exposure in the Triparty Repo settlement Segment provided by CCIL emanates mainly on two counts -

- a. Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction.
- b. Risk of default by a borrower in repayment.

### 4. Risks associated with stock lending

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/ or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned. There is also a possibility of opportunity loss.

For details please refer SAI.

## B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. If either/both of such limit(s) is breached during the NFO of the Scheme, it shall be ensured that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these

two conditions. During the ongoing offer these two conditions shall be complied with on calendar quarter basis, on an average basis, as specified by SEBI. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at applicable NAV. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the Applicable Net Asset Value on the 15th day of the notice period. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

In order to track the investor's holding rather than the folio/account's holdings, the fund houses are recommended to track the investors at the master folio/ master account (whatever be the terminology used by the fund houses) level. In addition since there is a possibility of an investor holding multiple accounts, the account is identified for the purpose of aggregation to comply with 20/25 rule by using a common parameter like PAN. Thus, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, Master Folio/Master Account, since there is possibility of an investor holding multiple accounts. In line with AMFI's suggestion, tracking of investor's holding & number of investors may be conducted using a common parameter like PAN, master folio/master account, since there is possibility of an investor holding multiple accounts. In case of multiple folios, the sequence or the order of the compulsory redemption is left to the discretion of the fund house in consultation with the investor.

## C. SPECIAL CONSIDERATIONS

## M. INDIAN DEBT MARKETS - PILLARS OF THE INDIAN ECONOMY

India's bond market has witnessed a rapid growth in the last five years. Its total market capitalization was ₹ 128 trillion (\$1.79 trillion) as on October 2019 according to NSE data.

India's bond market comprises mainly of sovereign bonds, corporate bonds and money market assets. Sovereign bonds comprised 71% of the market capitalization; corporate bonds were 24% while money market assets comprised 5% of the market capitalization.

Sovereign bonds are issued by the Government of India & Indian States to finance their budget deficits. The budget deficit is generally announced in the Union Budget for the next financial year. It is widely followed by the market participants for their analysis on the government finances. It forms the basis for India's monetary policy and demand-supply dynamic in the secondary market.

The Government of India typically funds a significant portion of its budget deficit by auctioning government bonds on weekly basis. The auction calendar is made public in advance. For last few years, the government has made conscious efforts to auction bonds with residual maturity greater than ten years in order to lengthen its maturity profile. The government also auctions Treasury Bills on weekly basis to finance their short-term cash flow mismatches. The government's Treasury Bill auction calendar is also available for market participants in advance. The government auctions 91-day treasury bills on every Wednesday while 182-day & 364-day treasury bills are auctioned on alternate Wednesday. Indian states also borrow in the bond market by auctioning State Development Loans (SDL) on alternate Tuesdays. These bonds are mostly purchased by Banks, Insurance companies as well as other market participants due to their sovereign nature, superior secondary market liquidity and statutory holding requirements by the regulators.

Indian corporate entities as well as Public Financial Institutions typically borrow wholesale money from the debt capital market. Primary supply of corporate bonds has been steadily increasing in the last three years in proportion to the increase in the demand for quality assets from mutual funds, insurance companies, foreign portfolio investors and pension funds.

As on October 29, 2019, size of the Indian government bond market is around 55 trillion, which is distributed amongst 88 unique issues. As compared to that India's corporate bond market is more fragmented. The total corporate bond market size is around  $\mathfrak{T}$  31 trillion, which is distributed amongst around 23,400 unique issues.

The average daily trading volume in the Indian Government Bond market is around ₹ 40,000 crore comprising 1.4% of the amount outstanding. As compared to that the average daily trading volume of bond issued by CPSEs is around 2,100 crore comprising 0.46% of the outstanding amount as per NSE.

In the last three years CPSEs has issued around ₹ 5 trillion worth of bonds amongst around 375 private placement issues.

Plans / Options offered	In terms of SEBI Circular No. CIR/IMD/DF/21/2012 dated September 13, 2012, direct investments by investors, viz. where the investment is not routed through distributors but made directly by the investors, are required to have a separate plan (i.e. Direct Plan) and a separate NAV Expenses such as distribution expenses, brokerage or commission payable to distributors will not be charged to the investment made via direct investment and hence the Direct Plan will have a lower expense ratio.			
	Based on the above, the Scheme offers a choice of two plans:			
	1. Direct Plan; and			
	2. Regular Plan			
	Investors subscribing under Direct Plan of the Scheme will have to indicate "Direct Plan" agains the Scheme name in the application form i.e. "BHARAT Bond FOF - April 2030". Investors should also indicate "Direct" in the ARN column of the application form.

2	Not mentioned	Direct	Direct Plan
3	Not mentioned	Regular	Direct Plan
4	Mentioned	Direct	Direct Plan
5	Direct	Not mentioned	Direct Plan
6	Direct	Regular	Direct Plan

8	Mentioned	Not mentioned	Regular Plan

If the application is received incomplete with respect to not selecting Regular/Direct Plan, the application will be processed as under:

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

Each Plan under the Scheme offers a choice of two options:

- (a) Growth Option
- (b) Dividend Option
  - Dividend Payout
  - Dividend Reinvestment
- (a) Growth Option: No Dividend will be declared under this Option. Income / profits received / earned on the Scheme's corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV). Unit holders who opt for this Option will not receive any dividend in normal circumstances.
- (b) Dividend Option (Payout Facility): Under this Option, dividend will be declared subject to the availability of distributable surplus as computed in accordance with SEBI Regulations. Dividends, if declared, will be paid (subject to deduction of dividend distribution tax and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date. AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that actual declaration of dividends and frequency thereof is at the discretion of Board of Trustees. There is no assurance or guarantee to Unit holders as to the rate of dividend distribution nor that the dividends will be declared regularly, though it is the intention of the Mutual Fund to make regular dividend distribution under the Dividend Option. On payments of dividends, the NAV will stand reduced by the amount of dividend paid and the dividend distribution tax, if applicable.
- (c) Dividend Option (Reinvestment): Unit holders opting for dividend option may choose to reinvest the dividends to be received by them. Under this facility the dividend due and payable to the Unit holders will be compulsorily and without any further act by the Unit holders, reinvested in the dividend option at a price based on the prevailing Net Asset Value per Unit on the record date. The Units for the purpose of re-investment will be created and credited to the Unit holder's account at a price based on the prevailing Ex-Dividend Net Asset Value (NAV derived post declaration of dividend) per unit on the record date. There shall, however, be no load on the dividends so reinvested. In case the selected date for dividend declaration falls on a holiday/non-Business Day then the next Business Day will be considered.

#### **Default Option: Growth Option**

If the investor does not clearly specify the choice of Option at the time of investing, the Units of the Scheme will be allotted in the Growth Option of the Scheme.

#### **Default Dividend Facility: Dividend Reinvestment**

If the investor selects Dividend Option but fails to mention the facility, it will be deemed that the investor has opted for Dividend Reinvestment facility.

## Dividend Distribution Procedure:

SEBI Circular lays down the procedure for Declaration of Dividend which clearly says that quantum of Dividend and record date shall be fixed by the Board of Trustees and AMC shall issue a notice to the public communicating the decision about dividend including the record date, within one calendar day of the decision made by the Board of Trustees in their meeting.

Record date shall be the date that will be considered for the purpose of determining the eligibility of investors whose name appears on the register of Unit holders. Record date shall be five calendar days from the issue of notice.

The Trusteeship Company reserves the right to declare dividend on a regular basis. The Fund does not guarantee or assure declaration or payment of Dividend. Although the Trustees have intention to declare Dividend under Dividend Option, such declaration of Dividend if any, is subject to Scheme's performance & the availability & adequacy of distributable surplus in the Scheme at the time of declaration of such Dividend.

Investors should note that, when the Mutual Fund declares a dividend under the Scheme, the dividend warrants shall be dispatched within 30 days of the declaration of the dividend. The requirement of giving notice & the above laid procedure shall not be compulsory for Scheme/ plan/option having frequency of dividend distribution from daily upto monthly dividend.

#### • Effect of Dividends:

When dividends are declared and paid under the Scheme, the net assets attributable to Unit holders in the Dividend Option will stand reduced by the dividend amount subject to dividend distribution tax and statutory levy if any. The NAV of the Unit holders in the Growth Option will remain unaffected by the payment of dividend.

Even though the asset portfolio will be un-segregated, the NAVs of the Growth Option and Dividend Option will be distinctly different after declaration of the first dividend to the extent of distributed income, tax and statutory levy paid thereon, where applicable, and expenses relating to the distribution of dividends.

### Mode of Payment of Dividends:

The Scheme proposes to pay dividend by Direct Credit or through RTGS or NEFT or any other EFT means.

RBI offers the facility of EFT for facilitating better customer service by direct credit of dividend amount to a Unit holder's bank account through electronic credit which avoids loss of dividend in transit or fraudulent encashment. The Mutual Fund will endeavour to offer this facility for payment of dividend/repurchase proceeds to the Unit holders residing in any of the cities where such a Bank facility is available.

The Fund is arranging with selected bankers to enable direct credits into the bank accounts of the investors at these banks. If an investor has an account with a bank with which the Fund will tie up for direct credit, the dividend amount will be credited directly to the bank account, under intimation to the Unit holder by email/SMS/post. The Mutual Fund, on a best effort basis, and after scrutinising the names of the banks where Unit holders have their accounts, will enable direct credit/RTGS/NEFT/ to the Unit holders' bank accounts.

While the preferred mode of payment is through EFT route, the AMC may in the interest of the investor decide to pay dividend by any other means i.e. at par cheques and demand drafts, where the EFT facility is not available in a particular city or Bank.

All the dividend payments shall be in accordance and compliance with SEBI Regulations, as amended from time to time.

**Dividend Policy** 

If Unit holders have opted for Dividend Payout Option, if the dividend amount payable to such Unit holders (net of tax deducted at source, wherever applicable) is less than or equal to  $\gtrless$  250, following treatment shall be:

- a. Where the option to payout dividend is available in electronic mode: The dividend amount shall be paid to the Unit holders. However, if the payment through electronic mode is unsuccessful, the AMC shall issue dividend warrant for such amount; and
- b. Where the option to payout dividend is not available in electronic mode: The AMC shall issue dividend warrant for such amount.

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014.

Edelweiss Mutual Fund ("the Fund")/ Edelweiss Asset Management Limited ("the AMC") is classified as a FFI under the FATCA provisions, in which case the Fund / AMC is required, from time to time, to:

- (i) undertake necessary due diligence process by collecting information/documentary evidence of the US/non US status of the investors;

- (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/ guidelines issued by SEBI/AMFI in this regard.

=₹10\*0%

=₹0
