Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) of the Units will be calculated on every Business Day and for such other days as may be required for the purpose for transaction of Units. The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of the Scheme's Investments+ Receivables+ Accrued Income+ Other Assets- Accrued Expenses- Payables- Other Liabilities}}{\text{Number of Units Outstanding}}$$

The NAV of the Scheme will be calculated and declared upto 4 decimal places & the fourth decimal will be rounded off higher to next digit if the fifth decimal is or more than 5 i.e., if the NAV is Rs. 10.12345 it will be rounded off to Rs. 10.1234.

Illustration of NAV:

If the net assets of the Scheme, after considering applicable expenses, are Rs.10,45,34,345.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows: $10,45,34,345.34 / 10,00,000 = \text{Rs. } 10.4534$ per unit (rounded off to four decimals).

The Mutual Fund will ensure that the repurchase price will not be lower than 95% of the Applicable NAV.

B. Risk factors

Scheme Specific Risk Factors

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

1. Risks Associated with Fixed Income and Money Market Instruments:

- * **Interest rate risk:** Price of a fixed income instrument falls when the interest rates move up and vice-versa, which will affect the NAV accordingly.
- **Spread risk:** Investments in corporate bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this spread widens which will affect the NAV of the Scheme accordingly.
- **Credit risk or default risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations.
- **Liquidity Risk:** The Risk of non execution of sale/purchase order due to low volumes is liquidity risk.
- **Reinvestment risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security.
- **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Market risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.

2. Risk Factors associated with Underlying Scheme i.e. BHARAT Bond ETF – April 2025:

i. Lack of Vibrant Secondary Market for Units of BHARAT Bond ETF – April 2025:

Although the Units of BHARAT Bond ETF – April 2025 will be listed on the Stock Exchanges such as NSE and BSE, there can be no assurance that a vibrant secondary market for units of BHARAT Bond ETF – April 2025 will be developed or maintained by the Authorised Participants.

ii. Halting of Trading in Units of BHARAT Bond ETF – April 2025:

Trading in the Units of BHARAT Bond ETF – April 2025 on NSE and BSE may be halted because of market conditions or for reasons that in view of NSE, BSE, SEBI or any other Regulatory authorities, trading in the units of the BHARAT Bond ETF – April 2025 is not advisable.

In addition, trading of the BHARAT Bond ETF – April 2025 are subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange and SEBI ‘circuit filter’ rules.

There can be no assurance that the requirements of NSE and BSE necessary to maintain the listing of the Units of the BHARAT Bond ETF – April 2025 will continue to be met or will remain unchanged.

iii. Lack of secondary market depth:

In case of unit creation and unit redemption in BHARAT Bond ETF – April 2025. BHARAT, Bond ETF – April 2025 will have to either buy a basket of securities or sell a basket of securities. This requires an active secondary market for underlying securities at all points of time. A lack of depth in secondary market for underlying securities could hamper the efficient transaction in unit creation and unit redemption.

iv. Units of BHARAT Bond ETF – April 2025 may trade at prices other than NAV:

Depending on the demand-supply dynamic, the of BHARAT Bond ETF – April 2025 may either trade on the Stock Exchange above or below its NAV. This may give rise to arbitrage opportunities. However, the in-built mechanisms of unit creation and unit redemption in the form of Cash or in-kind is designed to reduce the arbitrage opportunity for market participants.

v. Regulatory Risk:

Any changes in Regulations by SEBI / RBI / Stock Exchange / GOI / and other decision makers may hamper the ability of the market participants in trading to arbitrage resulting into wider premium/discount to NAV.

vi. Asset Class Risk:

The returns from the types of Securities in which BHARAT Bond ETF – April 2025 invests may under-perform returns of general Securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

vii. Risk of Investment Strategy

As units of BHARAT Bond ETF – April 2025 would be primarily investing in the Bonds of CPSE/CPSU/CPFI or any other eligible entities, any government policy which will have an impact on central public sector enterprises, including any change in the disinvestment policy of the government, could impact the price of the underlying assets. This may have negative impact on the performance of the Scheme.

viii. Risk of Credit Rating changes

It is understood that most of the CPSEs securities’ higher credit rating is due to government ownership and implied government support. Any potential change in government control, shareholding pattern, market perception, corporate action etc., could result in potential downgrade of credit rating of the Issuers. This may have negative impact on the performance of BHARAT Bond ETF – April 2025.

ix. Risk of Investment in eligible securities

The Scheme objective of BHARAT Bond ETF – April 2025 is to invest in CPSEs securities as defined in the Index. BHARAT Bond ETF – April 2025 will invest in the securities predominantly through private

placement route. These securities are generally auctioned on Electronic Bidding Platforms (EBP) in anonymous manner through competitive bidding. It is quite possible that the BHARAT Bond ETF – April 2025 may not be able to subscribe to these securities in sufficient quantities. This may result in sub-optimal asset allocation until the next bidding takes place.

x. Risk of variation in asset allocation as compared to the Index

BHARAT Bond ETF – April 2025 intends to accept “in-kind” unit creation request from investors. The criteria for securities eligible for “in-kind” subscription has been defined in this document. It is possible that the “in-kind” subscription may result in variation in asset allocation as compared to the Index asset allocation.

xi. Risk of sovereign rating change

The valuation of the CPSEs securities is based on the shape of the sovereign bond yield curve. The level of sovereign bonds are, apart from other factors, dependent on the sovereign rating of India by global Credit Rating Agencies. Any potential change in India’s sovereign credit rating may have direct impact on the levels of sovereign bonds which in turn may have impact on the CPSEs securities.

xii. Risk of higher supply of CPSEs securities

There has been an increase in total issuances of CPSEs securities in last 3 years. This has resulted in “crowding out effect” in the corporate bond market. As a result, credit spreads of certain CPSEs issuers with higher supply have widened as compare to other CPSEs issuers. This has also resulted in higher concentration for certain CPSEs issuer resulting in lack of appetite. Any incremental issuance from these CPSEs is likely to be met with lukewarm response from the investors, resulting in further widening of credit spreads.

xiii. Lack of supply of eligible securities with desired maturity

The target maturity bond ETF structure has a pre-defined maturity date. This necessitate investment in eligible securities maturing within 3 months before the maturity date of the Scheme. Any decline in potential supply of eligible securities maturing within 3 months before the maturity date of BHARAT Bond ETF – April 2025 may expose the Scheme to the reinvestment risk or investing in lower yielding T-bills / TREPS in the maturing year of the BHARAT Bond ETF – April 2025. This may be detrimental to the investor interest.

xiv. Increase in supply of Tax-free bonds from CPSEs Issuers

The target maturity bond ETF structure is designed to provide investor with long-term fixed income asset allocation to high qualities CPSEs with better tax-adjusted returns in the current interest rate environment. Any potential increase in supply of Tax-free bonds from CPSEs issuer may adversely impact the demand and future growth of BHARAT Bond ETF – April 2025.

xv. Risk of divergence in credit rating of BHARAT Bond ETF – April 2025 and the Index

BHARAT Bond ETF – April 2025 intends to invest in AAA rated CPSEs entities. Any potential credit rating downgrade will necessitate the Scheme to sell bonds of downgraded CPSEs entities at market level and invest in new AAA rated CPSEs entities. This exercise is dependent on the secondary market liquidity

in affected CPSEs entities. In case if the BHARAT Bond ETF – April 2025 is unable to liquidate these bonds in the open market, this will result in divergence in the credit rating composition between the BHARAT Bond ETF – April 2025 and the Index.

xvi. Risk of disinvestment / privatization of invested CPSE entities

The GOI has recently made several announcements regarding their intentions to either disinvest full or part of their holdings in several CPSE entities. In case if a CPSE entity, which is part of the portfolio, is privatized, it will result in exclusion from the Index. The Scheme will also be required to exit their positions at the prevailing market levels and reinvest the proceeds in CPSE entities at prevailing market levels. This may result in untoward volatility and undesirable outcome.

3. Risks associated with investing in Tri Party Repo through CCIL (TREPS):

Risk of exposure in the Triparty Repo settlement Segment provided by CCIL emanates mainly on two counts –

- a. Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Triparty Repo transaction.
- b. Risk of default by a borrower in repayment.

For details please refer SAI.

Foreign Account Tax Compliance Act (commonly known as “FATCA”):

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents (“US Persons”) through use of offshore accounts. The Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement (“IGA”) to implement the FATCA provisions, which have become globally applicable from July 1, 2014.

Edelweiss Mutual Fund (“the Fund”)/ Edelweiss Asset Management Limited (“the AMC”) is classified as a FFI under the FATCA provisions, in which case the Fund / AMC is required, from time to time, to:

- (i) undertake necessary due diligence process by collecting information/documentary evidence of the US/non US status of the investors;

- (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.
