Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) of the Units will be calculated on every Business Day and for such other days as may be required for the purpose for transaction of Units. The NAV shall be calculated in accordance with the following formula, or such other formula as may be prescribed by SEBI from time to time:

$$\text{NAV} = \frac{\text{Market or Fair Value of the Scheme's Investments+ Receivables+ Accrued Income+ Other Assets- Accrued Expenses- Payables- Other Liabilities}}{\text{Number of Units Outstanding}}$$

The NAV of the Scheme will be calculated and declared upto four decimal places & the fourth decimal will be rounded off higher to the next digit if the fifth decimal is or more than 5 i.e., if the NAV is Rs. 10.45367 it will be rounded off to Rs. 10.4537.

Illustration of NAV:

If the net assets of the Scheme, after considering applicable expenses, are Rs.10,45,36,745.34 and units outstanding are 10,00,0000, then the NAV per unit will be computed as follows: 10,45,36,745.34 / 10,00,0000 = Rs. 10.4537 per unit (rounded off to four decimals).

The Mutual Fund will ensure that the repurchase price will not be lower than 95% of the Applicable NAV

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

I. Introduction

A. Definitions/interpretation

For detailed description please refer -

https://www.edelweissmf.com/Files/SID%20/%20KIM%20/%20SAI%20related%20Disclosure/published/Definition_04062024_115739_AM.pdf

B. Risk factors

Apart from the risk factors mentioned in SAI, following are some of the additional risk factors which investors are advised to go through before investing:

Scheme Specific Risk Factors

The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc. Some of the Risks are listed below:

1. Risk associated with investing in Non Banking Finance and Housing Finance sector

- **Portfolio Concentration risk:** To the extent that the Scheme may concentrate its investments in the securities of certain issuers sectors, the Scheme will therefore be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of debt securities. These sectors may be more sensitive to economic cycles.
- **Systemic Risk:** The finance sector is highly interconnected. A crisis in one institution or segment can trigger a cascading effect throughout the sector, affecting even well-performing entities. Events such as payment failures or credit rating downgrades can lead to panic and widespread selling, impacting concentrated investments significantly.
- **Regulatory Changes:** The sector is subject to frequent regulatory changes. Concentration in specific financial instruments may expose investors to risks if regulations tighten suddenly
- **Interest Rate Risk:** Financial debt instruments are particularly sensitive to interest rate fluctuations. Concentrated investments in long-duration bonds can lead to greater price volatility as rates rise. Changes in the yield curve can disproportionately affect concentrated holdings, especially if they are heavily weighted in certain maturities.
- **Liquidity Risk:** Concentrating investments in a limited number of financial securities may lead to liquidity challenges. During market stress, selling these securities may become difficult without significant price concessions. If investors seek to redeem shares in a concentrated fund, the fund may struggle to liquidate positions quickly, leading to further price impacts and potential losses.

2. Risks Associated with investing in Debt and Money Market Instruments

- **Interest rate Risk:** Price of a fixed income instrument generally falls when the interest rates move up and vice-versa. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- **Credit risk or default Risk:** Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and/or principal payment obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Though the funds will actively invest in only AAA rated security, any downgrade in this rating will have a negative impact on the fund.
- **Liquidity & Settlement Risk:** The liquidity of a fixed income security may change, depending on market conditions leading to changes in the liquidity premium attached to the price of such securities. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. This can adversely affect the ability of the Fund to swiftly execute trading strategies which can lead to adverse movements in NAV.
- **Lot size risk:** To meet subscription / redemption requirement, fund manager may have to add /reduce odd lots of a security. Such odd lots may be harder to buy/ sell compared to round lots. This can result in longer buying / selling times or lower prices. The fund manager may decide to sell more feasible security or hold higher cash in fund until deployment or have to allot / reduce across funds of similar fund objective.
- **Reinvestment Risk:** Interest rates may vary from time to time. The rate at which intermediate cash flows are reinvested may differ from the original interest rates on the security, which can affect the total earnings from the security. If a concentrated fund holds a significant amount of bonds maturing in a specific timeframe, reinvestment options may be limited, potentially leading to lower returns.
- **Performance Risk:** Performance of the Scheme may be impacted with changes in factors, which affect the capital market and in particular the debt market.
- **Prepayment Risk:** The Scheme may receive payment of monthly cashflows earlier than scheduled, which may result in reinvestment risk.
- **Market Risk:** Lower rated or unrated securities are more likely to react to developments affecting the market as they tend to be more sensitive to changes in economic conditions than higher rated securities.
- **Concentration Risk:** The Scheme Portfolio may invest across sectors subject to SEBI prescribed limits applicable from time to time in line with Scheme objective, Investment strategy and applicable regulations.

3. Risks Associated with investing in Government Bonds:

Investment in Government securities like all other debt instruments is subject to price and interest rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in prices is a function of the existing coupon, days to maturity and the increase or decrease in interest rates. Price-risk is not unique to Government securities but is true for all fixed income securities. Despite a high degree of liquidity in comparison with other debt instruments on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.

4. Risk Factors associated with Passive Schemes:

a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets

relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select securities or to take defensive positions in declining markets.

b. Tracking Error and Tracking Difference Risk:

Tracking Error and Tracking difference is to measure the divergence of the performance (return) of the Fund's portfolio from that of the Underlying Index. Based on the availability of issuances by the Financial companies and other organizations and Fund management decisions, it is expected that the Portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error and Tracking difference. Tracking error / Tracking difference are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the underlying index. That said, the risk parameters of the portfolio of the Scheme and underlying index would be similar.

- Tracking error could be the result of a variety of factors including but not limited to:
- Due to investment in out of index investments
- Due to mismatch in the weight of the issuers forming part of the Index and the Scheme.
- Change in asset allocation between the Index and the Scheme in the last year of the Scheme.
- Difference in valuation of underlying bonds by the Index Provider and AMC's valuation providers.
- Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment, etc

Due to the reasons mentioned above and other reasons that may arise, the Fund will endeavor to keep the tracking error and tracking difference as low as possible. Under normal circumstances, such tracking error is expected to be below 2% per annum and the annualized tracking difference averaged over one year period is expected to not exceed 1.25%. However, it needs to be clearly understood that this is an indicative range and that the actual tracking error and tracking difference can be higher or lower than the range given under special circumstances.

c. Trade Execution Risk on RFQ Platforms:

Current SEBI regulations mandates Mutual Funds to execute certain % of their monthly trading volume in corporate bonds on RFQ platforms. RFQ platforms are peer-to-peer platforms and are still in development stage. Therefore, they have lower level of secondary market liquidity. Mandatory execution of trades on RFQ among MFs may hamper trade execution efficiency during periods of heavy outflows.

5. Risks Associated with exposure in Tri-party Repo

Risk of exposure in the Tri-party Repo settlement Segment provided by CCIL emanates mainly on two counts –

- 1) Risk of failure by a lender to meet its obligations to make funds available or by a borrower to accept funds by providing adequate security at the settlement of the original trade of lending and borrowing under Tri-party Repo transaction.
- 2) Risk of default by a borrower in repayment.

6. Risks Associated with segregated portfolio

- 1) Unit holder holding units of Segregated Portfolio may not able to liquidate their holdings till the recovery of money from the issuer.

C. Risk mitigation strategies

The Scheme will invest in Corporate Bonds which are constituents of the underlying Index Based on the availability of issuances, it is expected that the portfolio allocation could be different than that of underlying index allocation and could result in Tracking Error. That said, broad risk parameters of the portfolio of the Scheme such as credit rating, weighted average YTM, weighted average maturity, asset allocation etc. are expected to be similar to the Underlying Index.

The Scheme's exposure to Cash and Cash Equivalents will be in line with the asset allocation table.

This allocation will be monitored periodically, and it shall be ensured that investments are made in accordance with the Scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

Since disciplined investing requires risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The Scheme has a detailed process to identify, measure, monitor and manage various portfolio risks. The objective is to understand these risks and mitigate them wherever possible.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. There is a Board level Risk Management Committee which reviews overall risk management function.

Few of the key risk identified are:

Risk & Description specific to the Scheme	Risk mitigants / Management Strategy
Market/Volatility Risk Risk arising due to price fluctuations and volatility, having material impact on the overall returns of the Scheme.	The Scheme, being a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. Based on that, we expect to mitigate intermittent price volatility in the underlying assets. Investors who remain invested until the maturity of the Scheme are expected to mitigate market / volatility risk to large extent.
Credit risk Risk associated with repayment of investment	The Scheme intends to invest in AAA RATED bonds. However, in case of a downgrade on any issuer, the fund manager will endeavour to sell the security to meet the asset allocation and fund mandate. The
Liquidity risk	The Scheme seeks to track index consisting of AAA Bonds which has higher level of secondary market liquidity. In times of stress, the scheme

Risk arising due to inefficient Asset Liability Management, resulting in high impact costs.	may invest in government securities and money market instruments where liquidity risk is low
Interest rate risk Price volatility due to movement in interest rates	The Scheme being passively managed and a Target Maturity Date index fund structure, is expected to follow a Buy and Hold investment strategy in a passive manner. All investments are within the maturity date of the Scheme and the underlying Index. This should help mitigate the interest rate risk.
Concentration risk Risk arising due to over exposure in few securities	As per the index methodology and the regulations pertaining the passive funds, the scheme will invest in atleast 8 issuers.
Performance risk Risk arising due to change in factors affecting the market	The scheme is passively managed

D. Index methodology - CRISIL-IBX AAA NBFC-HFC Index – Jun 2027

About the index

Target Date	30 th June 2027
Eligible Period	The index will have securities maturing between 1st January 2027 to 30th June 2027.
Asset Allocation	AAA - Corporate Bonds: 100%

The index seeks to track the performance of AAA issuers from the NBFC & HFC sectors only maturing near the target date of the index. This is a sectoral index consisting of only issuers from the NBFC & HFC sectors

Eligibility criteria

- Issuers in the NBFC (as available in the RBI list of Non-Banking Financial Companies (NBFCs)) and HFC (as available in the list mentioned on the nhb.org.in website) sector with long term conservative rating of AAA with a minimum issuer-level total amount outstanding of Rs. 400 crores for securities maturing in the eligible period.
- Minimum security level amount outstanding of Rs. 100 crores.

Only listed issuers shall be included in the index. An issuer will be considered to be listed if at least one security of such issuer is listed on NSE and/or BSE as evaluated at the inception date of the index

Universe exclusions –

- Perpetual bonds
- Floating rate bonds
- Tax-free bonds
- CE/SO rated bonds
- Partly paid bonds
- Partial redemption bonds
- Single put/call options
- Embedded put & call options with same exercise date
- Securitized debt

Issuer selection at inception:

- All issuers qualifying the eligibility criteria mentioned above will form a part of universe.
- Up to 20 traded issuers from the universe will be ranked and selected based on liquidity score. If less than 8 issuers are available, then select remaining issuers (to bring the count to 8) based on the highest amount outstanding from the universe of outstanding securities as evaluated at the inception date of the index.
- Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter

Security selection at inception:

For each selected issuer, the security with highest residual maturity maturing in the eligible period will be selected from the eligible universe. The selected security must have a minimum amount outstanding of Rs. 100 crores.

No. of constituents:

Minimum: 8

Maximum: 20

Weighing approach:

- Weights to the issuers will be calculated in the ratio of amount outstanding as on the base date/review date of the index subject to issuer cap and group cap. Since it's a sectoral index sector caps are not applicable.
- Issuers weights should not exceed 15% for AAA rated issuers. Group cap of 25% will be ensured.
- Excess weight (if any) will be distributed amongst the remaining issuers of the index in the proportion of their existing weights such that all the caps are maintained
- When any issuer is excluded, the weight of that issuer will be redistributed proportionally amongst the rest of the issuers of the index in the proportion of their existing weights, subject to issuer & group cap.
- Weights of the issuers will change with price movement and will be reset during the semi-annual rebalancing period.

Rating change treatment:

In case any issuer gets downgraded below AAA, such issuers shall be excluded from the index within the next 5 working days. In that case, the weight of that issuer will be redistributed proportionally in rest of the issuers of the index, subject to issuer cap & group cap. In case of less than 8 issuers are present, then new issuers will be added (to bring the count to 8) from the last reviewed working data as per above mentioned issuer selection criteria at inception.

Cash flow treatment:

Any cash flows accruing to the index on account of coupon cash flows, part/full redemption of the security or securities, will be reinvested on the same day in the index in the proportion of existing weights subject to issuer & group cap.

Reconstitution/Rebalancing:

Issuer selection	In case less than 20 issuers are available in the index then, new issuers will be added based on the latest liquidity score of eligible issuers to bring the count to maximum 20. The index may have less than 20 issuers if sufficient issuers are not available. Amount outstanding based issuer selection will be used if total count falls below 8.
Treatment of existing issuers	Hold till maturity/will not exit the index unless there is a rating downgrade or change in status/classification of the issuer.
Security selection of new issuers	Same as the process followed during that on the inception of index.
Treatment of existing securities of existing issuers	Existing security will be replaced if there is another security of the issuer maturing nearer to the target date of the index.

Reconstitution frequency - Semi-annual (April, October)

Impact cost on reconstitution

At reconstitution, an impact cost is incorporated to the incoming and outgoing securities based on the liquidity classification of the issuer

Impact cost based on liquidity	Total impact cost (in bps)	Impact cost on each leg (buy or sell) in bps
Liquid	5	2.5
Semi-liquid	10	5
Illiquid	20	10

Weight reset frequency

- Semi-annual (April, October)
- The weights of securities/issuer will float based on the price movement and will be reset during the semi-annual review.

Maturity proceeds

- As the index includes securities that shall mature during the six-month period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final

maturity date of the index shall be reinvested according to following waterfall approach: - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (SDL in case of state/UT and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date with the same weightage. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022. In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022. In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date. If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate tracked by CRISIL Overnight index for any subsequent days till the maturity of the index.

- The effective date of rebalancing shall be the first working day of the rebalancing period.
- Any index having maturity date on a weekend (Saturday or Sunday), on a holiday, or on an unplanned market off, will mature on the next working day

Foreign Account Tax Compliance Act (commonly known as “FATCA”):

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents (“US Persons”) through use of offshore accounts. The Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement (“IGA”) to implement the FATCA provisions, which have become globally applicable from July 1, 2014.

Edelweiss Mutual Fund (“the Fund”)/ Edelweiss Asset Management Limited (“the AMC”) is classified as a FFI under the FATCA provisions, in which case the Fund / AMC is required, from time to time, to:

- (i) undertake necessary due diligence process by collecting information/documentary evidence of the US/non US status of the investors;
- (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and

(iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Further, in accordance with the regulatory requirements relating to FATCA/CRS read along with SEBI Circular no. CIR/MIRSD/2/2015 dated August 26, 2015 and AMFI Best practices guidelines circular no. 63/2015-16 dated September 18, 2015 regarding uniform implementation of FATCA/CRS requirements, investors are requested to ensure the following:

- With effect from November 1, 2015 all investors have to mandatorily provide the details and declaration pertaining to FATCA/CRS for all new accounts opened, failing which the application shall be liable to be rejected.
- For accounts opened between July 1, 2014 and October 31, 2015 and certain pre - existing accounts opened till June 30, 2014, the AMC shall reach out to the investors to seek the requisite information/declaration which has to be submitted by the investors before December 31, 2015. In case the information/declaration is not received from the investor on or before December 31, 2015, the account shall be treated as reportable account.
